

This educational software package is an integral part of the book Topographic Mapping and permission for use is granted only to those who purchase the book authored by Professor John N. Hatzopoulos: Topographic Mapping: Covering the Wider Field of Geospatial Information Science & Technology (GIS&T), Universal Publishers (January 31, 2008), ISBN-10: 1581129866, ISBN-13: 978-158112986. It contains 17 educational software packages which are given freely to those who purchase the book of Topographic mapping in question or to those who have been authorized by the author to use this material for educational purposes only and not for commercial purposes. Copying this present educational software is prohibited unless it is intended for individual use by authorized persons; also it is prohibited to transfer to a third party.

These educational software packages have been developed and are property of the author John N. Hatzopoulos, Copyright © 2009 all rights reserved.

Each software has its own subdirectory and wherever it is appropriate there are also data and results by running the corresponding software. More detail for the use of these software packages is given in Appendix B of the book Topographic Mapping.

**ATTENTION:** There is an effort so that this educational software is functioning properly and for this reason it is delivered as is. However, the author does not carry on any responsibility for any imperfectness in this software or for any damages by users which may be attributed to the use of this software.
